LAWN CARE & FERTILIZER

BASIC LAWN CARE PROGRAM

- ✓ Slow Release Granular Fertilizers
- ✓ Crab Grass and Weed Control
- ✓ Lawn Health Inspection and Consulting
- ✓ Scouting for Insect, Grub, and Disease Damage
(Insect and disease control are Extra Services)

ROUND 1: EARLY SPRING

The first visit we will apply fertilizer that will help your lawn bounce back from winter stress, green-up, and crabgrass control.

ROUND 2: SPRING

We will apply nutrient-enriching fertilizer to improve your lawn's density and color. Weed control, and second application of crabgrass control.

ROUND 3: EARLY SUMMER

The fertilizer applied during this visit will prepare your lawn for the strains of summer. We will scout for insects and apply broadleaf weed control as needed.

ROUND 4: LATE SUMMER

Controlled-released fertilizer with micronutrients will be applied to focus on maintaining healthy color and supply an easy recovery from drought stress. Weed control applied for broadleaf, nutsedge, and post-emergent crabgrass.

ROUND 5: EARLY FALL

Fertilizations applied in the fall are balanced to help lawn's root system thicken and recover from summer stress. Weed control applied as needed.

ROUND 6: WINTERIZATION

During this visit fertilizers will be used that encourage root growth and food storage that will help your lawn endure the winter months and come back to vibrancy earlier in the spring.

EXTRA LAWN CARE SERVICES

GRUB CONTROL & SURFACE INSECTS

Grub control is guaranteed to protect your lawn from the devastating Japanese beetle larva known as "White Grubs" as well as surface feeding insects.

FLEA & TICK CONTROL

Treatment of lawn to control fleas and ticks.

AERATION

Small plugs of soil are removed to release pressure from compacted clay soil, stimulating root growth, and allowing nutrients to penetrate to the roots which causes thicker lawn growth. Aeration also reduces thatch build up, which can "choke" healthy lawns.

SLICE SEEDING

Our seeder cuts into the ground and deposits the seeds in direct contact with soil to insure seed germination and a thick, healthy lawn.

HYDROSEEDING

Hydroseed with 18-24-12 starter fertilizer, tackifier, and compost material.

MOWING & TRIMMING

We offer mowing and trimming services to our clients, only when combined with other lawn care or landscaping services.

BRUSH HOG MOWING

Field Mowing with tractor and brush hog, or skid steer and ambusher.

PEST CONTROL

Rodents • Mosquitos • Termites • Stinging Insects • Spiders • Ants • Fleas / Ticks

BASIC PEST CONTROL PLAN

- ✓ Perimeter treatment of foundation, doorways and eaves (for general insects)
- ✓ TREATS: Ants, General Crawling Insects, Fall Invaders, and Winter Emerging Insects
